

Company presentation

JOLI MOULIN

Joli Moulin was founded by Dr. Joachim Müllerschön in 2019. As a trained computer scientist with his doctoral thesis in the field of production engineering, Joachim Müllerschön was responsible for the software development of warehouse logistics systems for 20 years. Due to his knowledge in the field of logistics, the foundation of a trading company was a logical step to be able to use his expertise in an ideal way.

The company is located in the south of Germany. Joli Moulin is a trading company and sells articles under its own brand. Currently, the distribution is mainly done on the trading platform Amazon. The focus of the articles is on pet products.

With Joli Moulin we want to accompany our customers and their pets with great products. We make sure that we offer only good and helpful products that also fit harmoniously into the environment. We also believe that the products should be pleasing to the owners themselves. Last but not least, the topic of sustainability is very important to us and we mainly include products in our range that make an important contribution here.

We are looking forward to meeting you and wish you much pleasure!
